Saved Reports Overview

Last Modified on 06/28/2022 11:23 am PDT

Merchant Manager reports are designed for you to interact with and save the filters as a report for later use. You can return to a saved report at any time by selecting *Reports* and *Saved Reports*. Alternatively, you can add a saved report to your Dashboard for easy access.

You can update the configuration or title of a saved report and share a saved report with any of your users with individual logins to your account.
