

# Dashboard Daily Transaction Charts

Last Modified on 06/28/2022 11:53 am PDT

Log in to **Merchant Manager** and view the **Dashboard**.

There are two separate charts for daily transactions: **Daily Transaction Amount** and **Daily Transaction Count**. If you process in [multiple currencies](#), you will see a drop-down at the top of the page. The drop-down allows you to select which supported currency is detailed in each graph. The titles of the charts will change to include a currency indicator.

You can interact with each chart separately. You may choose the time frame for the charts by selecting either *1 week*, *2 weeks*, *30 days*, *60 days*, or *90 days*. The default time frame is 90 days. Once you select a different time frame, you will see the chart refresh with the new data.

You can see details on the chart by hovering over any point. An information box will show details for that specific point in the time frame selected. The information in the box will change based on the transaction types you are currently viewing in the chart.

You can also filter the information based on the type of transaction. By default, all transaction types are shown. By clicking on the transaction types, you can narrow down the information.
